

Xiujuan Zhang, Paul Voyles, University of Wisconsin-Madison

The Wisconsin MRSEC Advanced Materials Industrial Consortium (AMIC) has organized a series of lunch-time seminars by engineers from member companies and prospective member companies. These seminars introduce students, faculty, and staff to the engineering challenges and career opportunities of the industrial partners.

Over the 19 seminars, there were 156 unique attendees and an average audience of 55 for each talk. The seminars fostered 12 additional discussions with faculty around collaborative research, and the interactions have helped extend the AMIC membership to 23 companies.

Maggie Snyder from NorthStar Medical Radioisotopes Inc (on right) presents an AMIC lunch seminar.
